About Me

Hi ! I am an 18 year old art enthusiast, studying graphic design at Symbiosis Institute of Design, who loves to indulge and express my creativity and opinion through art and music.

I would describe myself as a curious and friendly person with a positive outlook towards life. My strengths lie in working hard and diligently while maintaining my calm under pressure. I mostly enjoy sketching portraits and observing things in a unique way and love to challenge myself with creative ideas and sharing them online.

I foresee myself becoming a professional designer one day.

Work Experience
